

Translating your website has never been easier.

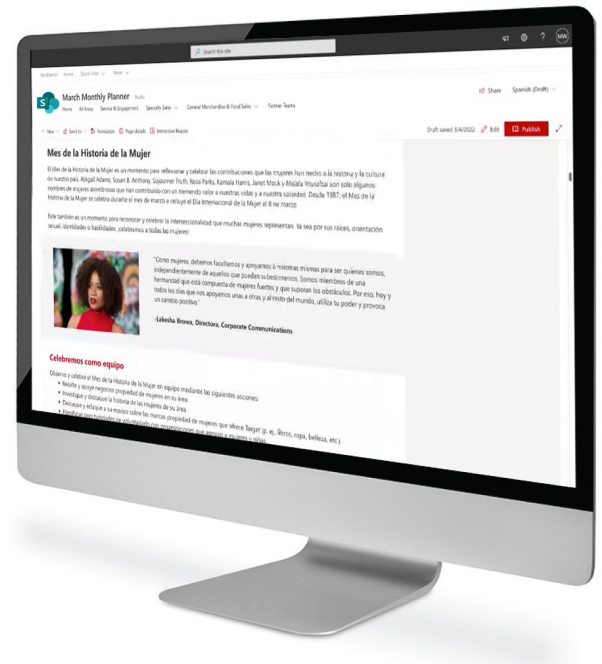

## Meet CMSConnect®

Translate web content in just a few clicks.

Argo Translation's CMS (Content Management System) connectors make managing the translation of your website simple. With only a few clicks, your pages are submitted for translation and later imported to production.

This service eliminates the need for costly development hours. You no longer need to manually handle any files related to the translation of your web content. No more cutting and pasting!

CMSConnect reduces both your cost and your completion times. We help you deliver your translated content to the market faster.

## Advantages

- No manual handling of files or building file/data dump sites
- Faster handling of updates and additions to your website
- No cutting and pasting of content
- Full transparency on translated cost

## Supported CMS

- Adobe Experience Manager
- Drupal
- Joomla
- Kentico
- SharePoint
- Sitecore
- Sitefinity
- WordPress
- Custom development of new systems available
